Good deal. I have one truck scheduled to start with, and as we determine the extent of the soil remediation, we will bring on more if needed.

Thanks,

Robert Andrew: Further to this note I have the manifests which will be used by the dump truck drivers to carry to the landfill with each load and will bring them to the site. This does not include any disposal for the tanks only back fill materials as was in the TPS scope of work.

Thanks,
Robert Trump

No Robert. This will be handled under the Total Petroleum Contract with Waste Management. They will not be required to do anything.

Hi Robert,

I'm assuming that Sac and Fox will need to establish an account with Waste Management, so we will be good to go when we get into soil farming, if they don't already have one.

Thanks,

Dear Mr. Drouare,

Yes this is correct. We received the approval from KDHE today for backfill/soil/sand etc to be disposed of at Rolling Meadows. See attached document. It is my understanding the old tank will be removed on Monday, December 12.

We are sending the additional impacted waters to Magellan Reclamation Facility under the same profile used in July of this year.

Thank you,

Robert

Notice of Profile Approval: 161670KS

Profile Number:	161670KS
Waste Stream:	Back Fill
Generator Name:	Sac & Fox Truck Stop
Disposal Site:	Rolling Meadows RDF
Comments:	A manifest is required for all shipments.
Expiration Date:	06/10/2017

Dear Robert Trump,

We are pleased to inform you that Profile 161670KS has been approved by our Midwest TSC Technical Service Center. Your Waste Approval Terms and Conditions can be found on either your *Profile Form* or *Approval Form*. Both documents are available as a PDF in the *Approved Tab* in your WMSolutions.com account.

Please feel free to email us at TSCMidwest@wm.com or call 800-963-4776 with any questions.

Thank you for choosing Waste Management.

Importance: High

Based on the e-mails I am seeing the site work is going to commence sometime around December 12 and carry on through at least December 19.

The site investigation scope of work (my focus) sounds reasonable.

Any guess on the date that the old tank will be removed from the ground? We may want representatives on site to observe the removal.

What are the plans (handling and destination) for how contaminated soil and groundwater will be handled?

Make sure that all the parties involved are obtaining all necessary permit/approvals for handling/disposing of soil/water.
